

Circle RASTER absorber line

FEATURES Circle Raster

Circle raster® is made from acoustic foam shielded with 11% perforated MDF board designed for absorption in mid frequencies. The geometry and the size of the panels make Circle panel attractive solution for your recording studio. Each panel heart is made from 50 mm acoustic foam and covered with perforated 11% oval MDF finish. The Circle panel is commonly used to control the midrange frequencies, helping you to improve the performance of your record studio.

APPLICATIONS Circle Raster

Recording Studio, Broadcast studios, TV studios, Home Cinema, Music Rooms, Piano Rooms, Vocal Classrooms, Auditoriums, Restaurants, Cafeterias, Live Performance Spaces, Public Spaces, Receptions, etc.
